Subject: Notice in Accordance with TSCA Section 8(e): Results of an acute immobilization test with *Daphnia magna* with an experimental pesticide

Dear Section 8(e) Coordinator:

[REDACTED] is submitting results of an acute toxicity study with [REDACTED]
on *Daphnia magna* (non-GLP preliminary test), conducted by [REDACTED]

[REDACTED] The test substance is an experimental pesticide.

The test was conducted in a static system over 48 hours according to the OECD Guideline for Testing of Chemicals, No. 202 (2004): *Daphnia* sp., Acute Immobilisation Test.

The following nominal concentrations were tested: 0 (control), Solvent control 10.0, 100 and 1000 µg/L.

All test solutions were visibly clear over the entire exposure period. The test substance is an active ingredient. Analyses were not carried out.

The following effect concentrations were obtained based on nominal concentration:

In the acute immobilization test with *Daphnia magna*, the EC₅₀/48 h is 68.08 µg/L

Explanation:

EC_x is the (effective) concentration of the test item (non-GLP preliminary test), causing X% immobilization of *Daphnia magna*
